

RNI All Films 5 for Adobe Lightroom CC — Installation Manual

Before you install

First time installation?

Skip to the next page.

Upgrading?

Please remove the previous installation of RNI All Films from your computer first by following the steps on this page.

Clean Up (Mac / PC)

Launch Adobe Lightroom CC. Then in the Presets panel right-click on each old RNI preset group you want to remove and select Delete Group.

Installation

Unzip the product. Then follow the steps:

Install (Mac / PC)

Launch Adobe Lightroom CC.

Go to File > Import Profiles and Presets and select the main folder containing the RNI profiles, presets and toolkit from your installation package.

Once the import is complete, the RNI All Films presets should become available from your Lightroom CC Presets panel.

Enjoy!
