

RNI All Films 5 for Lightroom Classic / ACR — Installation Manual

Before you install

If you are running **Lightroom Classic**, please make sure you've disabled the "**Store presets with this catalog**" option prior to the installation.

To disable it please launch Lightroom Classic, go to Lightroom / Preferences / Presets and untick the "Store presets with this catalog" checkbox.

Disabling this option is required for Lightroom to be able to pick up the globally installed profiles and presets such as RNI.

Installation

Unzip the product. Then follow the steps for your operating system.

Mac

- 1)
Run the .pkg installer included with the product. It will install all the components to their required locations for you.
- 2)
Relaunch Lightroom / Photoshop
- 3)
The RNI All Films presets should now be available from your Lightroom / ACR Presets panel.

Windows PC

- 1)
Copy all the RNI Film Presets and profiles with their enclosing folders to C:\ Users \ <YourUsername> \ AppData \ Roaming \ Adobe \ CameraRaw \ Settings*
- 2)
Relaunch Lightroom / Photoshop
- 3)
The RNI All Films presets should now be available from your Lightroom / ACR Presets panel.

* To access AppData folder open File Explorer, type %AppData% into the address bar and hit Enter

Enjoy!
